

Follow the instructions below to make your own Leaf Rubbings.

When you are finished, why not share a picture of your creation to our social media page?

You will need...

- Paper
- Wax crayons
- Leaves

Step One

Go outside! Collect different shapes and sizes of leaves. It is best not to pick leaves that are still growing on trees.

Step Two

On a flat surface, place your leaf or leaves upside down and flat. The veins of the leaf stand out more on the back of the leaf and you will get a better result.

Step Three

Place your piece of paper over the top of the leaf / leaves.

Step Four

Use a wax crayon (on its side works best) to rub over the top of the leaf / leaves.

Extra Step

Have a go at making patterns with the leaves and arranging them in different ways. You could build up the layers of rubbings for an interesting look!
